OBJECTIVE

- To develop diverse skills in Software Technology to make **valuable contributions** to **at least two of the company's projects and products within 6 months.**
- To enhance communication and problem-solving skills in order to **take on management responsibilities** for the company's products as **a permanent Software Engineer** in the future.

WORK EXPERIENCE

FREELANCE FRONT-END DEVELOPER   **Feb 2025 - Apr 2025**
MXANH   **Ho Chi Minh City, Vietnam**
- Developed the **Smart Waste Collection and Recycling System**: Defined system requirements, crafted UI/UX designs, and contributed to mobile development using **Flutter**.

FREELANCE FRONT-END DEVELOPER   **Dec 2024 - Apr 2025**
Garago.vn   **Ho Chi Minh City, Vietnam**
- Developed the **Automotive Service Search and Evaluation System**: Defined system requirements, crafted UI/UX designs, and contributed to website development using **Angular**.

FULLSTACK DEVELOPER   **Apr 2024 - Oct 2024**
CyberSoft Academy   **Ho Chi Minh City, Vietnam**
- Developed **TypeScript** docs, built a **Python**-based Transaction Management system, and compiled **Data Analysis** resources to support internal development.

PROJECTS

AIRBNB CLONE CLIENT (1 member, focus on Front-End)
github.com/MeiCloudie/airbnb-clone-client   **Sep 2024 - Present**

Description:
- Developed a client-side Airbnb clone replicating core platform features. This project aimed to enhance my skills as a **Front-End Developer** using technologies like **React**, **Next.js**, and **TypeScript** to create a modern and user-friendly interface.

Technologies:
- Front-End Framework & Libraries: Website using **React, Next.js, TypeScript.**
- Styling & UI Components: **Tailwind**, **shadcn/ui**.
- Back-End: Provided with API resources from CyberSoft Academy.
- Other Libraries: **Auth.js, Zustand, React Hook Form, Zod**.

Responsibilities:
- Built a website using **Next.js** to replace the original stack, applied Front-End best practices, and improved **load speed by ~50%** with mentor guidance.
- **Development Direction:** Independently build a Back-End server with API methods using **Node.js** and **Nest.js**, adding missing features compared to the main website.

HUTECH CLASSROOM (2 members, 1 Back-End, 1 Front-End)
github.com/MeiCloudie/hutech-classroom-client-app   **Feb 2023 - Dec 2023**

Description:
- Developed a Classroom Management System for HUTECH to simplify classroom tasks, support teachers and staff, and improve the student learning experience.

Technologies:
- Front-End: Website using **React, TypeScript, MUI, MobX -** Mobile/Desktop using **Flutter.**
- Back-End: ASP.NET Core, Clean Architecture, API development.
- Database: PostgreSQL.
- Other Libraries: SignalR, Mail Service, Azure Computer Vision.

Responsibilities:
- Led Front-End development using **React** for website design and **Flutter** for desktop and mobile interfaces, achieving a **70% boost** in website loading speed and a **50% enhancement** in user engagement metrics.
- Conducted user surveys with **over 100 participants** and analyzed system design to identify **50+ data constraints**, collecting data from **10+ real-world sources** to enhance the dataset and AI-based validation.
