

# TRƯƠNG THỰC VÂN

## SOFTWARE ENGINEER

**Location:** Ho Chi Minh City, Vietnam - **Phone:** +84 70 884 0623 - **Email:** tthvan.dev@gmail.com

**LinkedIn:** [linkedin.com/in/truongthucvan](https://www.linkedin.com/in/truongthucvan) - **Portfolio:** [thucvan-portfolio.vercel.app](https://thucvan-portfolio.vercel.app) - **GitHub:** [github.com/MeiCloudie](https://github.com/MeiCloudie)

## SUMMARY

Software Engineer with hands-on experience in Front-End Web Development and a strong foundation in UI/UX design. Skilled in building user-centered web applications using modern technologies such as **React**, **Node.js**, and **Next.js**. Passionate about problem-solving, system optimization, and enhancing technical as well as collaborative skills to deliver impactful digital products.

Aiming to grow as a Full-Stack Engineer building scalable, cross-platform solutions for web and mobile, leveraging modern frameworks and cloud technologies to create seamless user experiences.

## SKILLS

### TECHNICAL SKILLS:

- **Programming Languages:** HTML, CSS, SASS, JavaScript, TypeScript.
- **Frameworks / Platforms:** Node.js, React, Next.js; Tailwind, shadcn/ui, Bootstrap, MUI, Ant Design.
- **State Management:** MobX, Zustand, Redux.
- **Database:** PostgreSQL, MySQL.
- **Tools & Others:** Postman, DBML, Docker, GitHub, Jira, Figma.

### SOFT SKILLS:

- Strong collaboration and communication within cross-functional teams.
- Excellent problem-solving and analytical thinking.
- Creative and user-centered approach to design and development.
- Skilled in data analysis and summarization.

## WORK EXPERIENCE

### TECHNICAL SUPPORT ENGINEER

**VNPT**

**Aug 2025 - Sep 2025**

**Ho Chi Minh City, Vietnam**

- Conducted system bug analysis, identified issues, and generated detailed, clear reports.
- Provided training, guidance, and technical support to customers, ensuring efficient use of system features.
- Collected customer feedback, consolidated insights, and contributed to feature development ideas for system enhancement.

### FRONT-END DEVELOPER

**MXANH**

**Feb 2025 - Apr 2025**

**Ho Chi Minh City, Vietnam**

- Led the design and development of a Smart Waste Collection and Recycling System, defining system requirements and technical specifications.
- Designed user-friendly UI/UX interfaces with Figma, focusing on intuitive navigation and accessibility across devices.
- Researched and applied Flutter to prototype key mobile features like waste categorization, scheduling, and notifications.

### FRONT-END DEVELOPER

**Garago.vn**

**Dec 2024 - Apr 2025**

**Ho Chi Minh City, Vietnam**

- Contributed to defining system requirements and planning key functionalities for the Automotive Service Search and Evaluation System.
- Designed modern, user-friendly UI/UX using Figma, with a focus on responsive layout and intuitive user flow.
- Assisted in developing the web application using Angular, implementing core features such as garage location search, service evaluation, and garage sales management.

## FULLSTACK DEVELOPER

Apr 2024 - Oct 2024

### CyberSoft Academy

Ho Chi Minh City, Vietnam

- Developed TypeScript documentation by researching and organizing over 20 key resources, enhancing content creation by 50% as a valuable company asset.
- Built a Transaction Management project in Python, meeting approximately 90% of the company's specifications, with potential for future development to expand capabilities by an estimated 20%.
- Compiled a structured documentation set by consolidating around 50 resources, including applicable datasets, for Data Analysis with Python.

## EDUCATION

### FRONT-END DEVELOPER

Apr 2024 - Oct 2024

#### CyberSoft Academy

- Score: **10.2/11**
- Completed a 6-month Front-End Developer program at CyberSoft Academy, gaining practical experience in real projects using HTML, CSS, JavaScript, React, Tailwind CSS, and Next.js under Agile team collaboration.

### SOFTWARE ENGINEERING

Sep 2020 - Sep 2024

#### Ho Chi Minh City University of Technology (HUTECH)

- GPA: **3.86/4.00**
- Graduated as **Valedictorian of the Program**.

#### Certifications

- Valedictorian of Information Technology Program (Dec 2024).
- CyberSoft Academy: Professional Front-End Developer.
- Udemy Certificate: Next.js 14 & React - The Complete Guide.
- English B1 Certificate.
- Communication & Teamwork Skills Certificate.

#### Achievements

- Top 1 student in the Information Technology Department for the academic year 2022 - 2024.
- Outstanding student for four consecutive years from December 2020 to December 2024.
- Second Prize, Group C - IT Website Programming at IT Got Talent competition in 2023.
- Third Prize, IT Contest - Code Your Future sponsored by CJ company in 2023.

## PROJECTS

### AIRBNB CLONE CLIENT(Individual Project, focus on Front-End)

[github.com/MeiCloudie/airbnb-clone-client](https://github.com/MeiCloudie/airbnb-clone-client)

Sep 2024 - Jan 2025

#### Description:

- Developed a client-side Airbnb clone replicating core platform features. This project aimed to enhance my skills as a Front-End Developer using technologies like React, Next.js, and TypeScript to create a modern and user-friendly interface.

#### Technologies:

- Front-End Framework & Libraries: Website using React, Next.js, TypeScript.
- Styling & UI Components: Tailwind, shadcn/ui.
- Back-End: Provided with API resources from CyberSoft Academy.
- Other Libraries: Auth.js, Zustand, React Hook Form, Zod.

#### Responsibilities:

- Built a website using Next.js to replace the original stack, applied Front-End best practices, and improved load speed by ~50% with mentor guidance.
- Development Direction: Independently build a Back-End server with API methods using Node.js and Nest.js, adding missing features compared to the main website.

## CYBER SHOE SHOP (Individual Project)

<https://github.com/MeiCloudie/cyber-shoe-shop>

Jul 2024 - Aug 2024

### Description:

- Developed a fashion e-commerce website interface focused on shoe products, practicing API integration to fetch and render product data dynamically. The project was built with vanilla HTML, CSS, JavaScript, and enhanced with SASS to create modular, maintainable, and responsive styling for a modern shopping experience.

### Technologies:

- Front-End: Website using HTML, CSS, SASS, JavaScript, Bootstrap (Responsive UI/UX).
- Data Source: Provided REST API (Product & Category Data).

### Responsibilities:

- Integrated a provided product API to fetch and display shoe listings and item details, structuring JavaScript code for clear data handling, dynamic rendering, and maintainable component logic across the website.
- Leveraged SASS features (variables, mixins, nesting, and partials) to build a scalable, responsive styling architecture, improving UI consistency and making layout adjustments across breakpoints faster and easier.

## CORPVISION (Individual Project)

<https://github.com/MeiCloudie/corpvision>

May 2024 - Jun 2024

### Description:

- Built and deployed a corporate marketing website for Corpvision, designed as a high-conversion landing platform to showcase business information, highlight service offerings, and reinforce brand credibility. The project focused on delivering a clean visual structure, responsive layouts, and fast-loading static pages optimized for user engagement.

### Technologies:

- Front-End: Website using HTML, CSS, JavaScript, Bootstrap (Responsive UI/UX).

### Responsibilities:

- Designed and optimized a fully responsive layout using Bootstrap, ensuring consistent rendering and seamless user experience across desktop, tablet, and mobile devices.
- Implemented interactive animations and smooth transition effects using JavaScript and CSS, enhancing visual engagement and improving overall user interaction on key service and information sections.

## HUTECH CLASSROOM (2 members, 1 Back-End, 1 Front-End)

[github.com/MeiCloudie/hutech-classroom-client-app](https://github.com/MeiCloudie/hutech-classroom-client-app)

Feb 2023 - Dec 2023

### Description:

- Developed a Classroom Management System for HUTECH to simplify classroom tasks, support teachers and staff, and improve the student learning experience.

### Technologies:

- Front-End: Website using React, TypeScript, MUI, MobX - Mobile/Desktop using Flutter.
- Back-End: ASP.NET Core, Clean Architecture, API development.
- Database: PostgreSQL.
- Other Libraries: SignalR, Mail Service, Azure Computer Vision.

### Responsibilities:

- Led Front-End development using React for website design and Flutter for desktop and mobile interfaces, achieving a 70% boost in website loading speed and a 50% enhancement in user engagement metrics.
- Conducted user surveys with over 100 participants and analyzed system design to identify 50+ data constraints, collecting data from 10+ real-world sources to enhance the dataset and AI-based validation.
